

# CONNOLLY KIT

## BENTLEY COLOUR CHART

The colours below are the full range of leathers used in Bentley Motor Cars from 1965 - 1997. We do have a larger selection in our database, which we can search if you either email or call us. The larger range covers special coachbuilt models where one off or limited run hides were used. We also have many pre 1965 colours matched and also many modern colours as well.

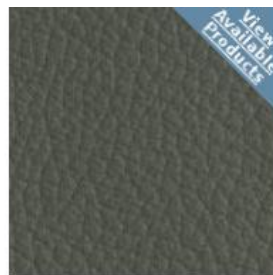

For all standard coloured leather, please refer to the colour chart below.

For all non-standard coloured leather, we will require you to send a sample of leather for colour matching (unless black) and we will mix renovator to match.
